Sail Building & Repair

with Kathy Kludy of Madison Area Technical College, Wisconsin

Kathy Kludy, a sailor and a paid upholsterer for the Madison Area Technical College, noticed one day that the college had a room set up with large tables, floor space and sewing machines and thought "This would be an ideal place for a sail building class".

Kathy had been using her canvas and sail making skills to pay for her membership in the local Hoofers Sailing Club for years. When she mentioned to her fellow Hoofers that she might start a class in sailmaking, she received an enthusiastic response.

A class of 12—husbands and wives, fathers and sons, and friends came about. Some brought in sails that needed repairs. Others contacted Sailrite and bought Sail Kits to build. The class was a big success and the college has now approved 2 more classes for Kathy to teach this year. Kathy invites interested sailors to contact her at kkludy@matcmadison.edu. Space is limited so don't procrastinate. Kathy discusses the sailmaking process from beginning to end. Some results of her students's work are pictured above. Congratulations Kathy and New Sailmakers

"In working at the college I noticed the sewing room was empty for long periods of time and I thought, this would be an ideal place for a sail building class."
