

College Data and Research

Six programs and one service area have completed LSQIP so far this academic year. The Institutional Research and Effectiveness staff have been hard at work coordinating surveys that support the various projects and initiatives across the College:

- Spring 2008 Graduate survey now in progress
- Preparations for Summer 2008 graduate surveys in process; survey administration will start in February 2009
- Apprenticeship Survey data submitted to WTCS on time
- Employer surveys for 4 programs to start soon in order to comply with program accreditation requirements – these surveys are separate from College-wide Employer surveys, which will occur in 2009
- CCSSE/ Noel-Levitz SSI working group created and planning together to administer both surveys during the spring 2009 semester – includes identification of 15 consortium specific questions

In addition, IRE updated/revised numerous Cognos reports in order to better meet customer needs and/or address issues caused by Cognos software upgrades.
